

INFINITY™ SINGLE SHOT FIRING PANEL

Description

The Infinity Single Shot Firing Panel is specifically designed to initiate DynaEnergetics' electronic detonators and igniters. This standalone panel only functions in single-shot mode, selective perforating is not possible. Additionally, a firing circuit check of the electronic detonator or igniter can be performed using minimal current (<1mA) for safety.

The Infinity Single Shot panel can initiate a detonator or igniter using either negative or positive voltage.

Features

- **Single shot panel, battery powered**
- **Compatible with shooting GR correlation tools**
- **Safely checks full system function on surface including faulty wiring**
- **Detect grounding and wiring issues**

Specifications

ITEM	INFINITY SINGLE SHOT FIRING PANEL
Part Number	2329709
Weight with Batteries	1600 g / 3.5 lb
Dimensions L x W x H	180 mm / 7" x 120 mm / 4.7" x 51 mm / 2"
Maximum Output Voltage	±30V
Maximum Measurement Current	200mA
Drop Tested	1.5 m / 5 ft
Operating Temperature	-20°C to 63°C / -4°F to 145°F
Waterproof	IP 67
Material	Aluminum
Batteries	8x AA (1.5V)

Note: Product condition must be monitored, inspected and maintained regularly to ensure proper service in accordance with DynaEnergetics guideline. Failure to do so may result in personal injury and/or property damage. For questions please contact your DynaEnergetics representative.
