

Description

The DynaEnergetics Pressure Safety Switch Sub is an additional safety device used to prevent unintentional detonation of a perforating gun while it is still on the surface.

The Pressure Safety Switch Sub is assembled in a normally closed (shunted) position and will only allow detonator initiation at pressures greater than 20bar / 290psi. The sub will also revert back to its normally closed position at pressures smaller than 10bar / 145psi.

Available Sizes

See below

Recommendations

- Follow DynaEnergetics assembly instruction.
- Should be assembled as close to the time and location of use as practicable.
- All spare parts in the redress kit, including all O-rings must be replaced after each run.

Selection Chart

Part No.	Size (mm / ")	Gun String Position
2326055	73mm / 2.88"	Bottom Sub
2317374	86mm / 3.375"	Bottom Sub
2317375	102mm / 4.0"	Bottom Sub
2317376	114mm / 4.5"	Bottom Sub
2317373	Redress Kit	
<i>Other Sizes available on request</i>		

note: Product condition must be monitored, inspected and maintained regularly to ensure proper service in accordance with DynaEnergetics guideline. Failure to do so may result in personal injury and/ or property damage. For questions please contact your DynaEnergetics representative.
